

## **F&D's new sound of elegance - the A330U - 2.1 speakers**

You have seen elegance, but have you ever wondered what it sounds like? Perhaps the latest entrant in F&D's line of speakers, the A330U might help you in it. The firm's expertise in delivering new entertainment experiences has been proven again with the 2.1 speakers. This black beauty promises nothing less than a seamless crisp sound to your senses that will prove to be a useful companion for music lovers, especially those who like their surroundings thumping.

Beginning from the style sphere, this black beauty has a unique cubic design with golden rings at its centre, giving an edge not many speakers offer. Housed in a wooden cabinet, the A330U delivers a strong and low distortion bass. Add to its design the 'super volume knob' along with a white LED ring with treble and bass control on the side panel, it becomes more user-friendly than you can think.

F&D's core promise is excellent sound, and the A330U will help you add another dimension to your favourite music by giving crystal clear sound. This speaker comes with USB port and SD-memory card slot so you can play your favourite music directly without the need to connect the speaker set to a computer. Moreover, it also offers smooth connectivity to MP3 players, PC, TV, CD, DVD.

As for the numbers, the A330U offers a rated output of 28W for the sub-woofers and 14W for each of the satellite speakers, with a frequency response of 30Hz-20KHz for that perfect sound experience.

One might peg these kind of features in a respected brand to cost in five figures, but F&D isn't being difficult for music lovers across sections. The A330U, priced at Rs 3990 /-, make it the most desirable product in its category.

### **About F&D:**

Established in 2004, Fenda has been dedicated to bringing a quality sound experience to the Indian market. Its brand F&D, under which it markets its multimedia and laptop speakers and docking stations, has since grown into offering more than 30 products, which are today available at all major electronic stores and dealer locations across India. Focused on customer feedback and being developed at high-tech labs, Fenda's products deliver crystal clear sound and come in a stylish design.
